REMARKS

This is UNEVALUATED Information

25X1

1. Gyoer airfield, which is located on the eastern outskirts of the town, measured 1,800 meters in length and 1,200 meters in width. The field had a concrete runway about 1,000 meters long and extended from northwest to southeast. Taxiways led from both ends of the runway to the concrete aprons in front of the hangars on the western edge of the field. Ten Soviet tanks were seen in a hangar at the southwestern edge of the installation.
2. In December 1951, the former artillery barracks installation at Gyoer-Szabadhegy quartered a Soviet Air Force unit whose soldiers wore light blue service color. No vehicles or equipment were observed at the installation.

25X1

1. Comment. For sketch of the installation, see Annex. It is believed that the field is still used by Maszovlet (Hungarian-Soviet Air Lines) and Omre (Hungarian Aviation Association).
